MONDAY, 10 JULY

3rd Workshop on Nanosciences & Nanotechnologies – NN06 [Physics Department, Room A31, Monday July 10: 9 am – 7.45 pm]

This is a one-day special Scientific Event co-organized by the Summer School and the Workshop. Since nonlinearity and complexity do not only appear at the nanoscale, but also indicate ways for manipulating nanoprocesses and manufacturing nanodevices, it should be useful for the future generation of mathematicians, physicists and engineering scientists to be aware of the richness and beauty of nanoscale phenomena. Thus, all participants of the **19th Summer School on NONLINEAR SCIENCE & COMPLEXITY** are required to attend the **1st day of the NN06 Workshop**. Several of the Workshop lectures of that day will be a good introduction to those lectures of the Summer School which, this year, are especially devoted to nonlinearity and complexity at the nanoscale. The NN06 Workshop is organized under the auspices of the NN Graduate Program, which is an **Interdepartmental Program of the Aristotle University of Thessaloniki (Physics, Chemistry, Biology and General Department of the Polytechnic School)**. Another special Cultural Event is organized for the first day of the second week (Monday, July 17) as described in the Program and a related leaflet. A separate page with the 1st day program of the NN06 Workshop will also be provided to the participants of the Summer School.
